Hi all

I am sending the following suggestion to you by email because getting ideas heard can be difficult during our time constrained meetings.

Number of responses to the Survey could be small unless securing the form is made easy by mailing or hand delivering to each household. The cost of mailing out would be small compared to the overall cost of developing the Survey. It is unfortunate that Canada Post discontinued unaddressed mail reaching Highlands residents only. I think it would be inappropriate to distribute the survey to the entire RR6 and RR7.

A survey form (or possibly two) could be mailed to each household address. The opportunity to phone for additional copies for other voting age members of the household or resident secondary suite occupiers could be provided.

Counterfeiting or stacking could be controlled by numbering the forms and self identifying respondents. Confidentiality could be assured. There are probably persons familiar with this need in the District Office. Returned forms could be mailed back or dropped off at the District office.

Bob

PS Laura The email addresses that came up for LCondon, Evan and Jennifer would not send so they will have not received this email.
